Typical mid-range mountains with well defined valleys and ridges. Varied topography, good overall rideability. Moderately dense path network. The vegetation is mainly deciduous forest. The rideability of tracks is usually good but depends on weather conditions.

The terrain is rich in protected habitats. Sensible route choices avoid them and/or marked as out-of-bound areas on the map. There are no additional restrictions on the competition.

Embargo: the terrain around Várgesztes village (see the map). No training is allowed until the competition.
